

(ALL SCHEMES IN DETAIL WITH ALL TYPES OF FORMS)

1 - "KAMDHENU SCHEME" (SUDHARIT)

INTRODUCTION:-

Government has introduced Kamdhenu scheme (Sudharit) strictly based upon the applicant fulfilling the following conditions:-

- a. The applicant has to be bonafide resident of Goa for at least 05 years.
- b. Shall possess a Pucca cattle shed with cement flooring for housing the animals proposed to be reared.
- c. Undertake to strictly stall feed the animals and not allow open grazing.
- d. New entrants should compulsorily undergo two weeks practical training on Government Farms.

The main reason for the success of the dairy programme in India is the involvement of milk producers in setting up their own organizations for milk production enhancement, milk procurement, processing and marketing. Dairying, as a subsidiary source of income, is a real relief to most of these weaker groups in society. In today's life style one or two milch animals are not sufficient to enable these farmers to generate sufficient additional income to break the various subsistence agricultural debt cycle. Animal Husbandry plays a vital role in providing household nutritional security, increased income, and employment especially of women and in rural transformation. Livestock provide economic security and social status to the family. Concentration of Livestock in general and small ruminants in particular, is in marginal, small and semi-medium holding, which mostly represent poorer sections of the society. Thus progress in livestock sector is directly related to a more balanced development of rural economy and upliftment of the poor sections of the society.

Dairying with high yielding crossbred cattle, Improved She Buffaloes and Indigenous breeds namely Sahiwal, Gir and Red Sindhi has become a remunerative business. Studies have shown that dairy enterprise as against crop in rural areas was on the top with regard to profit in marginal, small and medium holding. Dairying and crop production together for small farmers having irrigated land was more profitable than crop farming alone. Animal Husbandry components provide easy cash; therefore, small farmers prefer it to crop production.

To begin with and in order to accelerate at fast pace the daily milk production in the state the scheme is intended to be implemented with full zeal throughout the state and create special milk producing pockets called 'Dudh Gram Villages'.

The Dudh Gram Villages shall be carved out, based on their records of supply of maximum milk produced in a year and supplied to the Goa Milk Producers' Union and other authorized Agencies. The concept is to target these groups and attain faster results in these Villages/Gram Panchayats to be declared as Dudh Gram in the implementation of Milk Policy for the State with the intention of giving special attention in the policy and programme implementation.

4 - PASHUPALAN SCHEME (AMENDED) 2016-17

BREEDING AND REARING OF COWS/BUFFALOES/CALVES SCHEME

Introduction:-

The Livestock Economy penetrates sections of rural society both vertically and laterally, supposedly more equitably than land holdings.

Considerably there have been dramatic favorable changes in livestock population and composition over the past five decades, but overall impact on poor has not been much.

Goa has its own Breeding Policy and accordingly animals are to be bred using Jersey semen. However, the local cattle owners find it very difficult to stall-feed their unproductive indigenous cattle. This leads to the animals roaming in the streets looking for grazing patches or feeding from the dustbins as scavenger cows. Deaths in these cows are reported due to consumption of plastic bags over a period of time, which is total loss to the farmer and the State. Unlike stray dogs, the stray cattle have owners, who due to their own financial circumstances cannot stall feed the unproductive animals, as it is a further burden to their pocket. The promotion of dairy husbandry through crossbreeding of low productive local cattle is therefore to be given priority as most of the villagers own a few cattle. This programme will ensure techno-economic viability and prosperity to the small farmers. Local Cattle breeding, was initiated by the Government of Goa in early 70's, but was not popular, due to the high feeding cost during stall feeding.

Considering this scenario, further research and technology transfer are needed in areas of genetic improvement, reproductive efficiency and nutrition and health care, all these areas are equally important to improve the overall quantity and quality of milk production. Genetic improvement in this direction can further promote economic and eco-friendly dairy husbandry, which the small farmers are looking forward for their sustainable livelihood. There should be no limitation to the number of animals covered by individual farmer or organization. The indigenous breeds need to be conserved by breeding with semen of same breed & calves born to be reared scientifically. It is found that the entire cost of rearing of one calf from birth to 27 months is as high as Rs. 52800/- (Rupees fifty two thousand eight hundred only) and general category beneficiaries are getting 75% of the estimated cost of rearing a calf so as to motivate more farmers under Pashupalan Scheme.

Objectives:-

The main Objectives of the scheme are as follows:

- √ To encourage the cross breeding of cows and buffaloes.
- √ To encourage rearing of cross-bred calves/improved buffalo calves/Indigenous breed calves namely Sahiwal, Gir & Red Sindhi, from birth to 27 months.
- √ To encourage and uplift the S.C, S.T. & Dhangar community.
- √ To improve & sustain the productivity of cattle & buffalo through use of Artificial Insemination practices.
- √ To assist the farmer financially in stall feeding the local animals & rearing of the cross-bred calves/improved buffalo calves/Indigenous breed calves namely Sahiwal, Gir & Red Sindhi.
- √ To indirectly reduce the menace of stray cattle.
- √ To encourage NGOs/Goshalas/Community Farms & other organizations to take up calf rearing in scientific manner.
- √ To conserve the indigenous breeds.

Eligibility:

- All farmers availing the Artificial Insemination Facility for cattle and buffalo and registered with the local Government Veterinary Services.
- N.G.Os, Goshalas, Community Farms and other organizations availing the A.I. to cows & buffaloes.

- All farmers irrespective of their financial status.
- All the farmers having cross-bred female calves/improved buffalo female calves/Indigenous breed calves namely Sahiwal, Gir & Red Sindhi, either born out of A.I. or calves born to existing cows and buffaloes or bought along with animals under Kamdhenu Scheme or Western Ghat Scheme or Modern Dairy Scheme/purchased locally under any other scheme of the Government

Expectation on implementation of the Scheme :+

- ❖ This programme will eliminate stray cattle and conserve community or individual paddy field, crops, plantations and forests from being destroyed by grazing of stray cattle.
- ❖ Door to door, service will help them to avail timely services and to develop confidence in adoption of the technology.
- ❖ Promotion of healthy crossbred cattle/improved buffaloes/indigenous breeds of cattle namely Sahiwal, Gir & Red Sindhi.
- ❖ Unproductive local cattle population will be reduced.
- ❖ Non-dependence on neighboring States by beneficiaries for their requirement of crossbred animals under various Government Schemes.
- ❖ Increase in the number of crossbred cows/ improved buffaloes/indigenous breed cows namely Sahiwal, Gir & Red Sindhi, thereby giving a fillip to the yield of milk in Goa.

Procedure :

The scheme consists of three phases. The first phase deals with the Artificial Insemination of Non-descript cows and buffaloes. The second phase is the confirmation of pregnancy of inseminated animals and feeding incentives.

The third phase deals with rearing of female calves from birth to 27 months. All the Cross Bred calves, Improved buffalo calves and pure bred calves of Indigenous breeds namely Sahiwal, Gir & Red Sindhi shall be included in the scheme.

5 - “SCHEME FOR INCENTIVE TO GREEN FODDER CULTIVATION FOR PERENNIAL AND SEASONAL FODDER DEVELOPMENT IN THE STATE”

INTRODUCTION:-

The major constraint in the field of dairy development in the state of Goa is the lack of green fodder for the milch animals. The nutritive value of feed and fodder has a significant bearing on productivity of livestock, as such a provision of green fodder for feeding milch animals is very essential. Keeping this in view fodder development has been made an integral part of livestock development.

In the present scheme the subsidy has been enhanced from ` 40,000/- per hectare up to ` 65,000/- per hectare, and provides irrigation assistance to take up perennial green fodder cultivation having water source. Provisions have also been made for purchase of implements like water pump, PVC pipes, Sprinklers etc. with 75% subsidy on the total cost.

In order to cultivate perennial green fodder farmers can avail tussocks free of cost from Government Livestock Farm, Dhat, Mollem, Cattle Breeding Farm, Coperdem and Fodder Seed Production Farm, Kalay.

12 - The Goa Stray Cattle Management Scheme, 2013 (Modified)

Whereas, the Government of Goa deems it expedient to modify the scheme for the purpose of checking the menace of stray cattle in the State of Goa by making the scheme open to all the Municipalities, Panchayats, AWOs, Goshalas and Civic & Consumer Forums (CCF).

Now, therefore the Government of Goa is hereby pleased to modify the Scheme as follows:-

1. Short title and commencement :-

- (1) This Scheme may be called "The Goa Stray Cattle Management Scheme, 2013 (Modified)".
- (2) It shall come into force with effect from the date of its publication in the Official Gazette.

2. Introduction:-

The Government of Goa is concerned about the stray cattle menace which is causing traffic obstruction, deaths due to accidents on roads, agricultural damage and invasion of the touristic places like beaches. The traffic on Goa's roads is ever increasing and with it the road accidents are on the increase. It is observed that several of the road accidents are caused due to direct vehicular hits to the animals or because the driver of the vehicle had to turn to avoid hitting the animals on the road. Animals on the road are accident prone and pose much problems during the night when visibility becomes poor and movement of traffic goes faster.

The animals not only get injured or killed but invariably involve human beings getting injured or even killed in the accidents. It is desirable that animals are not found roaming freely on the roads and near wayside garbage bins etc.

Goa being a tourist destination, the stray animals on the beaches and wayside give an ugly picture of Goa. These animals should be shifted to a place where they can be better looked after rather than being left to go about as scavengers and be a nuisance to tourists.

Agriculture today is on the decline. The few enthusiastic farmers who still would like to pursue agriculture have to spend large amount of money to fence their agricultural crops so as to prevent stray animals from destroying their standing crops.

To overcome this nuisance on the roads, to improve the image of the State and to help encourage agriculture, a Scheme has to be formulated to control the stray animal menace by appointing an agency to impound the stray cattle on the roads.

The Scheme envisages the impounding of the stray cattle and transporting them by specialized vehicle to the Cattle Pound where arrangements will be made to look after the animals.

To make the Scheme citizen centric, the Scheme encourages the citizens to inform the Corporation of the City of Panaji, Municipalities, Panchayats, AWOs, Goshalas and Civic & Consumer Forums (CCF)/Person/Individual nominated by respective organizations on mobile about the presence of the stray cattle in their area, the mobile number shall be widely publicized and displayed at all the Municipalities, Panchayats and public places.

According to a rough estimate there are around 30,000 stray dogs in this State. A number of them were not cared for and are left either wounded or suffering from various diseases. Government of Goa is concerned about the suffering of stray animals on the streets and has come up with a Scheme to reduce the suffering of the stray dog population. Unregulated breeding has resulted in large number of sick and starving dogs and puppies on the streets and beaches. The Corporation, Municipalities and Panchayats will work with Mission Rabies, Worldwide Veterinary Services, India in the State to try to scientifically reduce and manage the number of strays by sterilizing them and vaccinating them against Rabies, resulting in control of the stray dog populations as well as protecting them against Rabies. The dogs once vaccinated against Rabies, cases of Rabies in humans will also reduce in the State. The main goal is to improve the welfare of stray dog populations through a comprehensive sterilization programme carried out as part of the animal birth control (ABC) scheme, under the Prevention of Cruelty to Animals Act 1960, and rules made there under.

Mission Rabies, Worldwide Veterinary Services, India have formulated a programme in Goa keeping in mind two main Aims i.e. Eradication of Rabies disease and Rabies free Goa. 17- The Goa Stray Cattle Management Scheme, 2013 (Modified)

Whereas, the Government of Goa deems it expedient to modify the scheme for the purpose of checking the menace of stray cattle in the State of Goa by making the scheme open to all the Municipalities, Panchayats, AWOs, Goshalas and Civic & Consumer Forums (CCF).

Now, therefore the Government of Goa is hereby pleased to modify the Scheme as follows:-

1. Short title and commencement :-

- (1) This Scheme may be called “The Goa Stray Cattle Management Scheme, 2013 (Modified)”.
- (2) It shall come into force with effect from the date of its publication in the Official Gazette.

2. Introduction:-

The Government of Goa is concerned about the stray cattle menace which is causing traffic obstruction, deaths due to accidents on roads, agricultural damage and invasion of the touristic places like beaches. The traffic on Goa’s roads is ever increasing and with it the road accidents are on the increase. It is observed that several of the road accidents are caused due to direct vehicular hits to the animals or because the driver of the vehicle had to turn to avoid hitting the animals on the road. Animals on the road are accident prone and pose much problems during the night when visibility becomes poor and movement of traffic goes faster.

The animals not only get injured or killed but invariably involve human beings getting injured or even killed in the accidents. It is desirable that animals are not found roaming freely on the roads and near wayside garbage bins etc.

Goa being a tourist destination, the stray animals on the beaches and wayside give an ugly picture of Goa. These animals should be shifted to a place where they can be better looked after rather than being left to go about as scavengers and be a nuisance to tourists.

Agriculture today is on the decline. The few enthusiastic farmers who still would like to pursue agriculture have to spend large amount of money to fence their agricultural crops so as to prevent stray animals from destroying their standing crops.

To overcome this nuisance on the roads, to improve the image of the State and to help encourage agriculture, a Scheme has to be formulated to control the stray animal menace by appointing an agency to impound the stray cattle on the roads.

The Scheme envisages the impounding of the stray cattle and transporting them by specialized vehicle to the Cattle Pound where arrangements will be made to look after the animals.

To make the Scheme citizen centric, the Scheme encourages the citizens to inform the Corporation of the City of Panaji, Municipalities, Panchayats, AWOs, Goshalas and Civic & Consumer Forums (CCF)/Person/Individual nominated by respective organizations on mobile about the presence of the stray cattle in their area, the mobile number shall be widely publicized and displayed at all the Municipalities, Panchayats and public places.

3. Objectives:

- a) To ensure removal of stray cattle from public areas without injuring them and carry them safely to a place where they will be fed properly and looked after in a humane manner. To manage the stray cattle in a humane and carrying manner.
- (b) To make farmers responsible for tethering their own animals.
- (c) To ensure that animals on grazing be accompanied by a responsible shepherd/owner.

Unregulated breeding has resulted in large number of sick and starving dogs and puppies on the streets and beaches. The Corporation, Municipalities and Panchayats will work with Animal Welfare Organizations in the State to try to scientifically reduce and manage the number of strays by sterilizing them and vaccinating them against rabies, resulting in control of the stray dog populations as well as protecting them against rabies. The dogs once vaccinated against rabies, cases of rabies in humans will also reduce in the State. Introduction

Among the various livestock species, piggery is most potential source of meat production and pigs are more efficient feed converters after the broiler. Apart from providing meat, it is also a source of bristles and manure. Pig farming will provide employment opportunities to seasonally employed rural farmers and supplementary income to improve their living standards. The advantages of the pig farming are:

1. They are prolific with shorter generation interval.
2. A sow can be bred as early as 8-9 months of age and can farrow twice in a year. They produce 6-12 piglets in each farrowing.
3. Pig farming requires small investment on buildings and equipments.
4. Pigs are known for their meat yield, which in terms of dressing percentage ranges from 65 - 80 in comparison to other livestock species whose dressing yields may not exceed 65%.
5. Pork is most nutritious with high fat and low water content and has got better energy value than that of other meats.
6. It is rich in vitamins like thiamin, Niacin and riboflavin.

fish ponds.
